# Chichester Local Plan Review - Regulation

## 18 Preferred Options Consultation

### Policy AL13 - Southbourne Parish

1. As set out in our representations to Policy S4, the Local Plan Review does not provide any flexibility with respect to the supply of housing. Thus, each of the identified strategic locations and allocations are required to deliver in full, and in a timely manner, in order for the Plan to meet its identified requirement (which itself is significantly lower than the actually identified need for housing in the District).
2. Further to our representations to Policy S5, we have significant reservations in terms of the proportion of the overall housing supply that is proposed to be delegated / deferred to parish neighbourhood plans. Indeed, contrary to the impression given by Policy S5 (which indicates that just 500 homes are allocated to the parishes), it is in fact the case that of the proposed District-wide supply, 2,500 homes are delegated to neighbourhood plans (by Policies AL8 – AL11 and AL13), with a further 500 homes required to be allocated by neighbourhood plans on non-strategic sites (see Policy S5). This places an extremely high reliance on neighbourhood plans to deliver the majority of genuinely new housing allocations in the District.
3. This is a very high risk strategy given the uncertainties associated with, and resources available to, neighbourhood planning. However, this risk is exacerbated by the fact that Policy S4 provides no flexibility in terms of housing supply, requiring all allocated housing to be delivered in full, and in a timely manner, to meet even the minimum housing number identified.
4. Policies AL8-AL11, and AL13 are included within the Plan under the overarching heading 'Strategic Site Allocations' (our emphasis). However this is misleading as none of these policies make any strategic site allocations. Instead, they simply allocate a (significant) housing number to each parish to be allocated by the relevant neighbourhood plans. Accordingly, other than the scale of the housing numbers in these policies, the approach is no different to that set out in Policy S5.
5. The National Association of Local Councils ("NCLA") report titled: 'Where Next for Neighbourhood Plans' (October 2018) identifies that neighbourhood plans generally take 2-3 years to produce, with 5 years not being unusual. This is also our experience. This means that any housing that is expected to be provided through neighbourhood plans cannot reasonably be relied upon during at least the first five years of the Plan (the lack of a housing trajectory in the Plan means that it is

not possible to determine when the Council relies on housing delivery from neighbourhood plan allocations - see our representations to Policy S4).

6. The Southbourne Neighbourhood Plan 2014-2029 was made in September 2015. It allocates three sites to deliver a total of 300 dwellings within the neighbourhood plan period. However Policy AL9 of the Local Plan Review would require the production of a revised neighbourhood plan to accommodate the delivery of at least 1,250 dwellings. This is a phenomenally high level of housing to be allocating to a neighbourhood plan process.
7. Southbourne Parish Council's website states that *"the Parish Council will not be entering into discussions with developers regarding further sites at this time"*. Moreover, it is unclear whether the Parish Council has agreed to accommodate such a significant level of growth and deliver it through a revised neighbourhood plan.
8. For these reasons we have serious reservations as to the deliverability (and appropriateness) of requiring the allocation of 1,250 homes at Southbourne through a neighbourhood plan process, particularly given the scale of other neighbourhood plan allocations also relied upon elsewhere in the District to meet the Council's minimum housing requirement.
